Prague 9th June 2015
Number of pages: 2

Additional information to the award conditions

according to the provisions of § 49 para. 1, 2, 3 of Act no. 137/2006 Coll. on Public Contracts, as amended (hereinafter "the Act")

upon written request of the bidder we provide additional information to the public contract with the title " Purchase of 4 optoelectronic stabilized platform systems for EC-135 T2+ helicopters "

Bidder's question no. 1:

Questions:

Our interpretation of the tender documentation is that this opportunity is for the supply of the equipment only. Will the installation and certification be the subject of a separate tender, and when is this likely to take place?

Contracting Authority's answer no. 1:

Yes, in accordance with the tender documentation it is only the delivery of the equipment. Installation and certification will be the subject of a separate tender in 2016.

Bidder's question no. 2:

Question:

Would it be possible to inspect one of the helicopters next week?

Contracting Authority's answer no. 2:

The inspection of the helicopter before the opening of envelopes is no longer possible due to reasons defined in 49 paragraph 5.

Bidder's question no. 3:

We note on page 11 z 25 that the procurement is for the delivery of system, including all peripheral devices, antennas, special installation fittings other special hardware etc. This could imply that interconnecting cabling / looms are also included. Our experience is that cabling and looms should be manufactured to exact measurements which are typically determined during the modification of the 1st aircraft.

Question:

Could you provide any guidance with regards to the Czech Police's approach in this regard?

Contracting Authority's answer no. 3:

You will find the details on the requirements for cabling in the officially published Additional information (answers to bidders' questions).
